SECTION II — RISK FACTORS

Investment in equity and equity-related securities involve a degree of risk and investors should not invest any funds in this Issue unless they can afford to take the risk of losing their investment. Before taking an investment decision, investors should carefully read all the information in the Prospectus, including the risks and uncertainties described below. The risks described below are not the only risks relevant to the Company or the Issue. Additional risks and uncertainties not currently known or that are currently believed to be immaterial may also impair the Company's business, financial condition and results of operations.

A. INTERNAL / BUSINESS RISKS

1. Our Company has a limited operating history and may not sustain its growth trajectory.

Acme Technologies Private Limited was incorporated on 2020-01-15. Our limited operating history makes it difficult to assess our future performance and prospects. Our growth may be adversely affected by factors that we may not be able to anticipate or control.

2. Our revenue is concentrated in a limited number of customers and geographies.

A significant portion of our revenue is derived from a limited number of customers in the Technology & IT sector. Loss of any key customer could adversely impact our business and financial condition. Additionally, our geographic concentration in certain markets exposes us to regional risks.

3. We face intense competition from established players in our industry.

The Technology & IT industry is highly competitive. We compete with larger, more established entities that have greater financial resources, wider market reach, and stronger brand recognition. There is no assurance that we will be able to maintain or improve our competitive position.

4. Our business requires significant working capital and we may face liquidity constraints.

Our business operations require continuous deployment of working capital. Any delay in collections, increase in credit periods, or unforeseen capital requirements may impact our liquidity and ability to execute on our growth plans.

5. We depend on key managerial personnel and skilled workforce.

Our success depends on the continued service and performance of our senior management team and key personnel. Loss of such personnel, or our inability to attract and retain talented employees, could have an adverse effect on our business.

6. Our operations are subject to various statutory and regulatory requirements.

Our business is subject to central and state government regulations, including those administered by MCA, SEBI, and sector-specific regulatory authorities. Any changes in applicable laws, non-compliance, or delays in obtaining regulatory approvals could adversely impact our operations.

B. ISSUE-RELATED RISKS

7. There is no existing market for our equity shares; the price of our shares may fluctuate significantly.

Prior to this Issue, there has been no public market for our equity shares. We cannot assure you that an active trading market for our shares will develop or be sustained after this Issue. The issue price may not be indicative of the price at which our shares will trade after listing.

8. Investors may not receive adequate returns on their investment.

The Issue price of our equity shares is based on factors described in "Basis for Issue Price". The actual performance of our Company and returns for investors may differ materially from those implied by the Issue price.

9. Our Issue size of ■ 18.00 Crore may not meet regulatory minimum thresholds.

SEBI requires SME IPOs to have a minimum paid-up capital of ■3 Crore post-issue. Any failure to achieve full subscription or meet regulatory requirements could result in the Issue being withdrawn.

10. Promoter lock-in requirements reduce immediate liquidity.

SEBI ICDR Regulations require promoter minimum contribution to be locked in for 3 years from the date of allotment. This restricts promoter ability to exit and may create downward pressure on share price post lock-in expiry.

C. EXTERNAL / MACRO RISKS

11. General economic conditions and market volatility could adversely affect our business.

Our financial performance is linked to the overall economic condition in India and globally. Economic downturns, recessions, inflationary pressures, changes in interest rates, and foreign exchange fluctuations could have an adverse effect on our business.

12. Geopolitical events and natural disasters could disrupt our operations.

Unforeseen events including natural disasters, pandemics, geopolitical tensions, and social unrest could disrupt supply chains, reduce consumer demand, and adversely impact our results.

13. Changes in government policy and regulatory environment.

Our business in the Technology & IT sector is subject to evolving government policies. Changes in taxation, trade policy, environmental regulations, or sector-specific policies could negatively impact our cost structure and profitability.

14. Climate change and ESG-related risks.

Increasing focus on environmental, social, and governance (ESG) factors by investors, customers, and regulators could require significant capital investment and operational changes that may adversely affect our business and results of operations.
